Ordered List (`<ol>`):

An ordered list is used when you want to present a list of items in a specific sequential order, typically with numbers or letters as list markers.

```
<ol>
    <li>Item 1</li>
    <li>Item 2</li>
    <li>Item 3</li>
  </ol>
```

Explanation:

- `<ol>`: This is the opening tag for an ordered list.

- `<li>`: Each list item is wrapped in an `<li>` (list item) tag.

- The numbers (or other markers) are automatically generated by the browser, indicating the order of the items.

Unordered List (`<ul>`):

An unordered list is used when the order of items doesn't matter, and you want to present a list of items with bullet points or other markers.

```
 <ul>
    <li>Item A</li>
    <li>Item B</li>
    <li>Item C</li>
  </ul>
```

Explanation:

- `<ul>`: This is the opening tag for an unordered list.

- `<li>`: Each list item is wrapped in an `<li>` (list item) tag.

- Bullet points (or other markers, such as squares or circles) are automatically generated by the browser.

Definition List (`<dl>`):

A definition list is used to group terms and their corresponding definitions together.

```
 <dl>
    <dt>Term 1</dt>
```

```
        <dd>Definition of Term 1.</dd>
        <dt>Term 2</dt>
        <dd>Definition of Term 2.</dd>
    </dl>
```

Explanation:

- `<dl>`: This is the opening tag for a definition list.

- `<dt>`: This tag is used for defining terms (labels).

- `<dd>`: This tag is used for defining descriptions or explanations of the terms.

In a definition list, the `<dt>` elements represent terms or labels, and the `<dd>` elements represent their corresponding definitions or explanations.

CODE TO WORK

```html
<!DOCTYPE html>
<html>
<head>
    <meta charset="UTF-8">
    <title>List Examples</title>
</head>
<body>
    <h1>Lists Example</h1>

    <!-- Ordered List (ol) -->
    <h2>Ordered List (Numbered)</h2>
    <ol>
        <li>First item in the ordered list</li>
        <li>Second item in the ordered list</li>
        <li>Third item in the ordered list</li>
    </ol>

    <!-- Unordered List (ul) -->
    <h2>Unordered List (Bulleted)</h2>
    <ul>
        <li>First item in the unordered list</li>
        <li>Second item in the unordered list</li>
        <li>Third item in the unordered list</li>
    </ul>

    <!-- Definition List (dl) -->
    <h2>Definition List</h2>
    <dl>
        <dt>Term 1</dt>
        <dd>Definition of Term 1.</dd>

        <dt>Term 2</dt>
        <dd>Definition of Term 2.</dd>

        <dt>Term 3</dt>
        <dd>Definition of Term 3.</dd>
    </dl>
```

```
</body>
</html>
```

Lists Example

Ordered List (Numbered)

1. First item in the ordered list
2. Second item in the ordered list
3. Third item in the ordered list

Unordered List (Bulleted)

- First item in the unordered list
- Second item in the unordered list
- Third item in the unordered list

Definition List

Term 1
  Definition of Term 1.
Term 2
  Definition of Term 2.
Term 3
  Definition of Term 3.
